DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 7-13 and 16-20, drawn to compositions comprising components A and B or A, B and C, classified in classes 524 and 525, subclass various
 - II. Claims 4 and 14, drawn to compositions comprising components A, B and D or A, B, C and D, classified in class 524, subclass various.
 - III. Claim 5, drawn to a composition comprising components A, B and E or A, B, C and E, classified in class 524 subclass various
 - IV. Claim 6, drawn to compositions comprising components A, B and F or A, B, C and F, classified in class 524, subclass various.
 - V. Claim 15, drawn to compositions comprising components A, B, F' and F" or A, B, C, F' and F", classified in class 524, subclass various.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I with each of II, III, IV and V are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as is in and of itself without the presence of additional ingredients whose presence would

engender a mutually exclusive final product and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Claims 1-20 are generic to a plurality of disclosed patentably distinct species of compositions. The election of an ultimate species of composition with specific ingredients is requested. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ana L Woodward whose telephone number is (703) 308-2401. The examiner can normally be reached on Monday-Friday (8:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James J. Seidleck can be reached on (703) 308-2462.
